

SECTION H: NEGOTIATIONS

HO Work Stoppage

WORK STOPPAGE

The Board is obligated and committed to provide certain basic services to children residing in the school districts under its jurisdiction, and as contracted; therefore, if the schools are open and the students are in attendance, those basic services will be provided. To neglect those responsibilities would result in the loss of funds to the Educational Service Center.

Recognizing the fact that a local district for various reasons could have a work stoppage, this Board remains committed to providing services to the schools and will fulfill its obligations.

Employees of the Board are required at all times to perform their normal duties as assigned by the Superintendent and his administration. Employees who fail to perform their duties when so required will be subject to disciplinary measures in accordance with the policies of this Board and the laws of the state.
