

# 6TH GRADE MATH TEACHERS UNITE!

Teaching 6th grade Math at a deep level of student understanding can be difficult, if not down right daunting. The modeling and reasoning portion of the End of the Course Exams has caused much discussion and anxiety. Let's join together in our professional search for instructional designs and delivery methods that work for our 6th grade students. With help from Authors Jo Boaler, Daniel T. Willingham, Stigler and Heibert, Paul Tough, Amanda Ripley and others, we will produce lessons that engage our students and help create deep thinking and discussion.

## Location

Southern State Community College  
100 Hobart Drive, Hillsboro, OH 45133  
Room 400
